

NJ SSI Partnership Program 2007-2008

Register for NJ SSI's **Partnership Program** and take the first step towards influencing generations of students in your school district!

This twelve-day professional development program will assist your local district in improving mathematics and science education programs and provide coherent, consistent support for implementing standards-based curricula.

Through strategic planning, districts identify professional development needs, use student data for decision-making, develop more effective instructional methodologies and build capacity for reform. Information is a key to success, and the program enables districts to reflect on existing student achievement patterns and plan appropriate improvement strategies.

To learn more about the Partnership Program plan to attend one of the orientation days at the Regional Center near you. A list of the orientation days is included in this announcement.
